Digital Transformation Journey with 1CloudHub

Advisory | Solutions | Implementation

Accelerate your journey and achieve faster time-to-value with 1CloudHub's three-pronged approach that combines cloud adoption, application and database modernization, and data analytics.

Data & Analytics Modernization

Gain Actionable Insights

Set up frameworks to collect, correlate and use mission-critical data.

Democratize access by centralizing data for all business functions.

Data lakes & Warehouses | Streaming analytics | Generative AI |

AI and ML to predict, forecast, recommend and personalize

Application Modernization

Transform Business Processes

Modernize your applications and databases with contemporary technologies.

App2Container | Cloud native App Dev | Monolith 2 Microservices | DB Freedom | DevSecOps
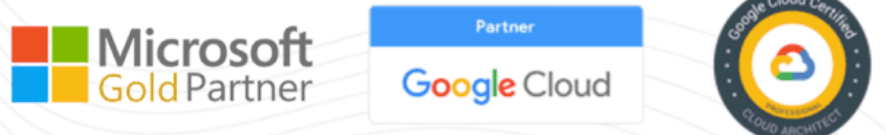

Infrastructure Modernization
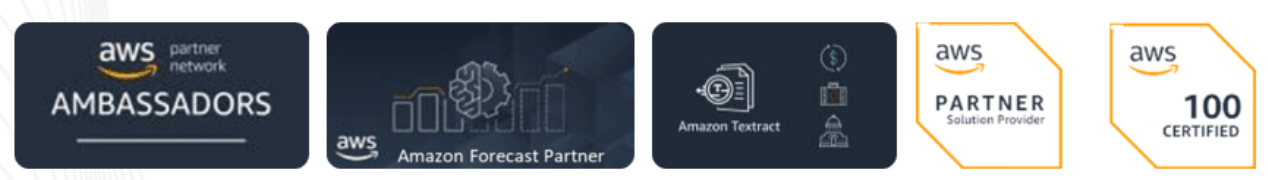

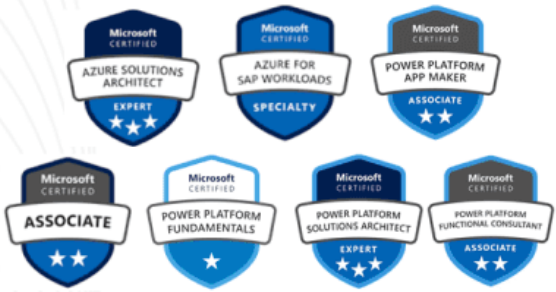

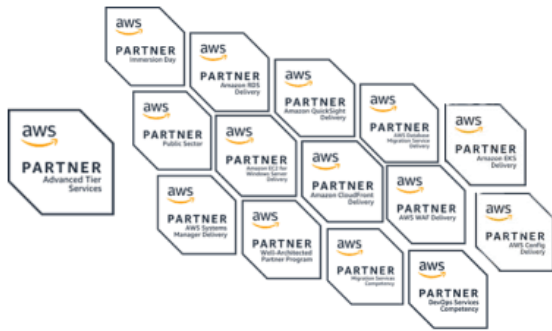

Adopt Cloud

Move your business to the cloud—or adopt a hybrid model—for more agility, scalability and advanced security.

Cloud Advisory | Assess-Mobilize-Migrate | CloudOps | FinOps | SecOps | DR

Adopt Cloud

Attain more agility, scalability and advanced security | Achieve optimal TCO and reduction in operational costs

Leverage our expertise in the industry **leading hyper-scalers**

> To Accelerate Your Cloud Transformation

Do it right the **first time**

> With Cloud Readiness Advisory, Migration and 24/7 CloudOps

Meet compliance and regulatory requirements, both **internal and industry**

> With well-architected landing zones on the cloud

Ensure cloud service **reliability, scalability and security**

> With A Well-architected Review For Your Cloud Infrastructure

Develop comprehensive understanding of **costs**; avoid **sticker shock every billing cycle**

> With A FinOps Strategy To Gain Back Cost Control

Cloud Platforms
AWS, Azure & GCP

Cloud Certified Experts

Transform Business Processes

Modernize your databases and applications for better process efficiency and business performance & Leverage cloud investments efficiently

Future-proof your **application portfolio**

> With Cloud-native App Development Containers & Serverless

Go from monolith to **API-driven microservices**

> For Faster, Frequent, Risk-free Releases To Gain Competitive Advantage
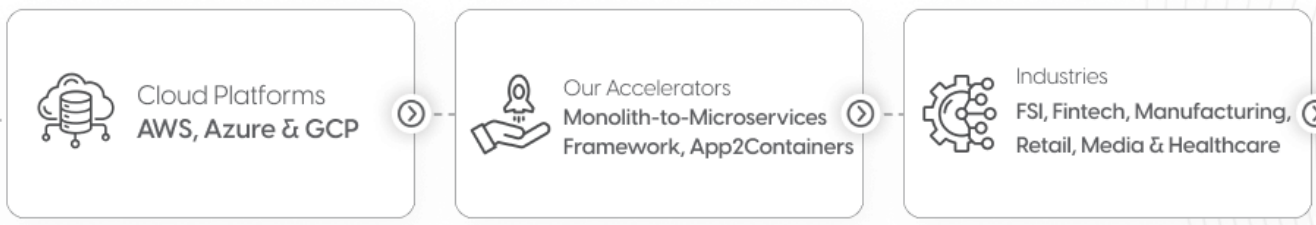

Monetize digital properties as **SaaS offerings**

> For Accelerated Business Growth

Automate & **streamline your IT**

> With DevSecOps

Cloud Platforms
AWS, Azure & GCP

CloudShifu.ai

Step into a realm of limitless cloud mastery through CloudShifu.ai, your definitive platform for multi-cloud prowess. Seamlessly integrating AWS, Azure, GCP, and OCI, CloudShifu.ai converges SysOps, FinOps, DevOps, and SecOps to redefine innovation and efficiency.

CloudShifu.Ai

OpsVista:

Navigating System Operations with Precision

· Embark on proactive cloud monitoring with SentinelSphere. Harness AI-driven agents to streamline alert complexities, automate ticket generation, and visualize real-time service health insights.

SwiftResolve:

Your Ultimate SLA-Driven IT HelpDesk

· Experience unparalleled IT support with SwiftResolve. Address technical issues swiftly, aligning with your Service Level Agreement (SLA) commitments. Monitor SLA compliance, automate escalations, and access real-time reports for actionable insights.
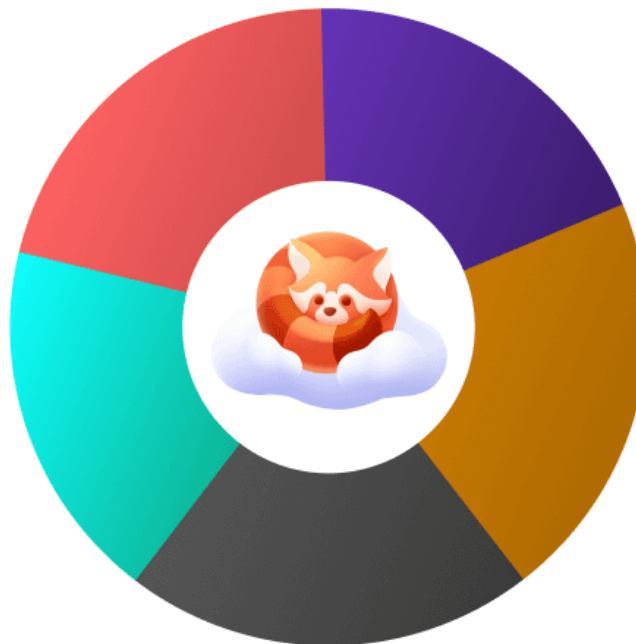

DevOps Express:

Seamlessly Orchestrated Automated Deployment

· Elevate your cloud deployment game with DevOps Express. Witness policy-driven onboarding, precise provisioning, cost impact assessments, code quality checks, security compliance, and automated test automation in a single click.

·

CostDeMaze:

Navigating Cloud Economics with Foresight

· Navigate the complexities of cloud cost optimization with CostDeMaze. Unleash AI-powered cost-saving recommendations, budget management, resource optimization, and real-time analytics.

SkySentinel:

Safeguarding the Cloud Frontier with Vigilance

· Empower your cloud security with SkySentinel. Detect threats in real time, respond swiftly to incidents, and maintain robust compliance. Enjoy comprehensive protection across cloud and hybrid landscapes.

CloudShifu.ai Driven Managed Services

	MANAGED SERVICE SCOPE	CloudShifu.ai	Team Enabled
DevOps	Cloud Infrastructure Provisioning	✓	Non Standard Requests
	Golden Image creation (VM & Containers)	✓	Policy Definition
	Policy Based Audit Reports	✓	Policy Definition
SecOps	Security Reports	✓	
	Operations Dashboard	✓	
FinOps	Cost Management - Cost Governance Policy	✓	Tagline & Recommended Implementations
	Cloud Infra Monitoring – VM, DB, K8 ..	✓	
SysOps	Backup/Retention management	✓	
	24/7 Cloud IT Service Desk – Alert Monitoring	✓	Actionable Incident Management
	Access management – Access Policy, User group Definition		✓
	Network Management – VPC, IP, Security Groups Configure	✓	
Custom Ops	Database Management – Install/Setup DB, Analyze performance metrics		✓
	Disaster Recovery Management – Support during drill		✓
	IM, CR, PM – Execute SOP's, RCA, Validate Changes		✓
